5.Insert the Following video (video must be autoplay)

Intermediate

6. Create the following page

Welcome to Coding Intro

About Programming

Programming is a way to "instruct the computer to perform various tasks". Confusing? Let us understand the definition deeply. "Instruct the computer": this basically means that you provide the computer a set of instructions that are written in a language that the computer can understand.

About HTML

Hypertext Markup Language (HTML) is the standard markup language for documents designed to be displayed in a web browser. ... HTML provides a means to create structured documents by denoting structural semantics for text such as headings, paragraphs, lists, links, quotes and other items
About CSS

Cascading Style Sheets is a style sheet language used for describing the presentation of a document written in a markup language such as HTML. CSS is a cornerstone technology of the World Wide Web, alongside HTML and JavaScript

8.Create the following:

1. **Select any topic you prefer.**
2. **Title should be hyperlink for website talk about that topic.**
3. **Should add 2 videos related to the topic.**
4. **Should add an introduction about topic.**

Boat

Description

A boat is a watercraft of a large range of types and sizes, but generally smaller than a ship, which is distinguished by its larger size, shape, cargo or passenger capacity, or its ability to carry boats. Small boats are typically found on inland waterways such as rivers and lakes, or in protected coastal areas. However, some boats, such as the whaleboat, were intended for use in an offshore environment. In modern naval terms, a boat is a vessel small enough to be carried aboard a ship

9.create the following:

10. Create the following form
